IN HARMONY WITH ALL STYLES OF ARCHITECTURE.

ADAPTED TO ALL KINDS AND STYLES OF BUILDINGS.

WHEELING CORRUGATING COMPANY.
ST. LOUIS, MO.

Economy is the Strongest Argument in the World.

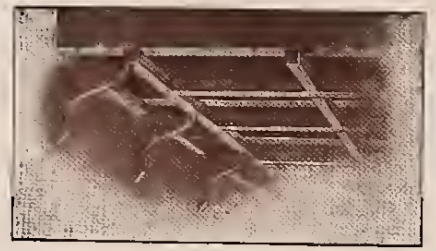
INSTRUCTIONS FOR APPLYING.

SEE ANALYSIS OF CONSTRUCTION OF A WHEELING METAL CEILING ON 3d PAGE OF THIS COVER.

FURRING FOR FLAT PLATES AND SHALLOW PANELS.

Strike chalk lines the length of the room, at distances indicated on the working drawing, so that they coincide with the center lines of the nailing beads on the plates. On these lines, nail $\frac{7}{8}$x1$\frac{1}{4}$ inch furring strips. Between these strips and across the room nail "headers" or cross strips at distances from center to center equal to the distances between centers of the nailing beads of the plates as indicated on the working drawing. Nail strips in angle of ceiling and wall and at a distance from the wall equal to the projection of the cornice to receive the comice brackets. Bring the strips to a uniform depth by driving wedges between the strips and the old ceiling or joists, otherwise the ceiling might present an uneven appearance when completed.

Flat plates and raised panels may be applied to sheathing, in which case no furring strips will be required, but the sheathing should be level.

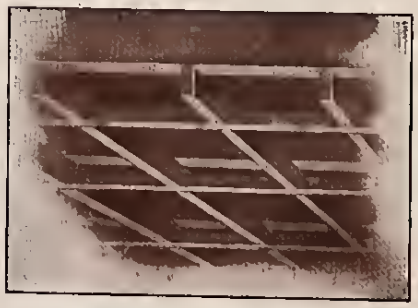


SINGLE FURRING

FURRING FOR DEEP PANELS.

Nail furring strips the length of the room, as for flat plates, carefully leveling them with wedges. Then nail other strips at right angles on top of these, at distances from center to center equal to the distances between centers of the nailing beads of the panels, and as shown on the working drawing. Nail "headers" or cross strips at right angles to the last strips and on top of the first strips applied. This will bring all strips to the same level. To bring the cornice to the level of the ceiling nail one strip on top of another in the angle between the ceiling and the wall and at a distance from the wall equal to the projection of the comice.

APPLYING THE CEILING.



DOUBLE OR CROSS FURRING

Apply the different members of the Ceiling in the following order:--- Field, Filler, Mold or Border, Comice.

Beginning at one comer apply the ceiling plates across and along the room, keeping the lapping edges running from the light. Each piece should be carefully lapped so the beads will be straight and true. The plates should be nailed at about 6-inch intervals with one inch wire nails with small heads. The filler plate is lapped under the member on either side of it.

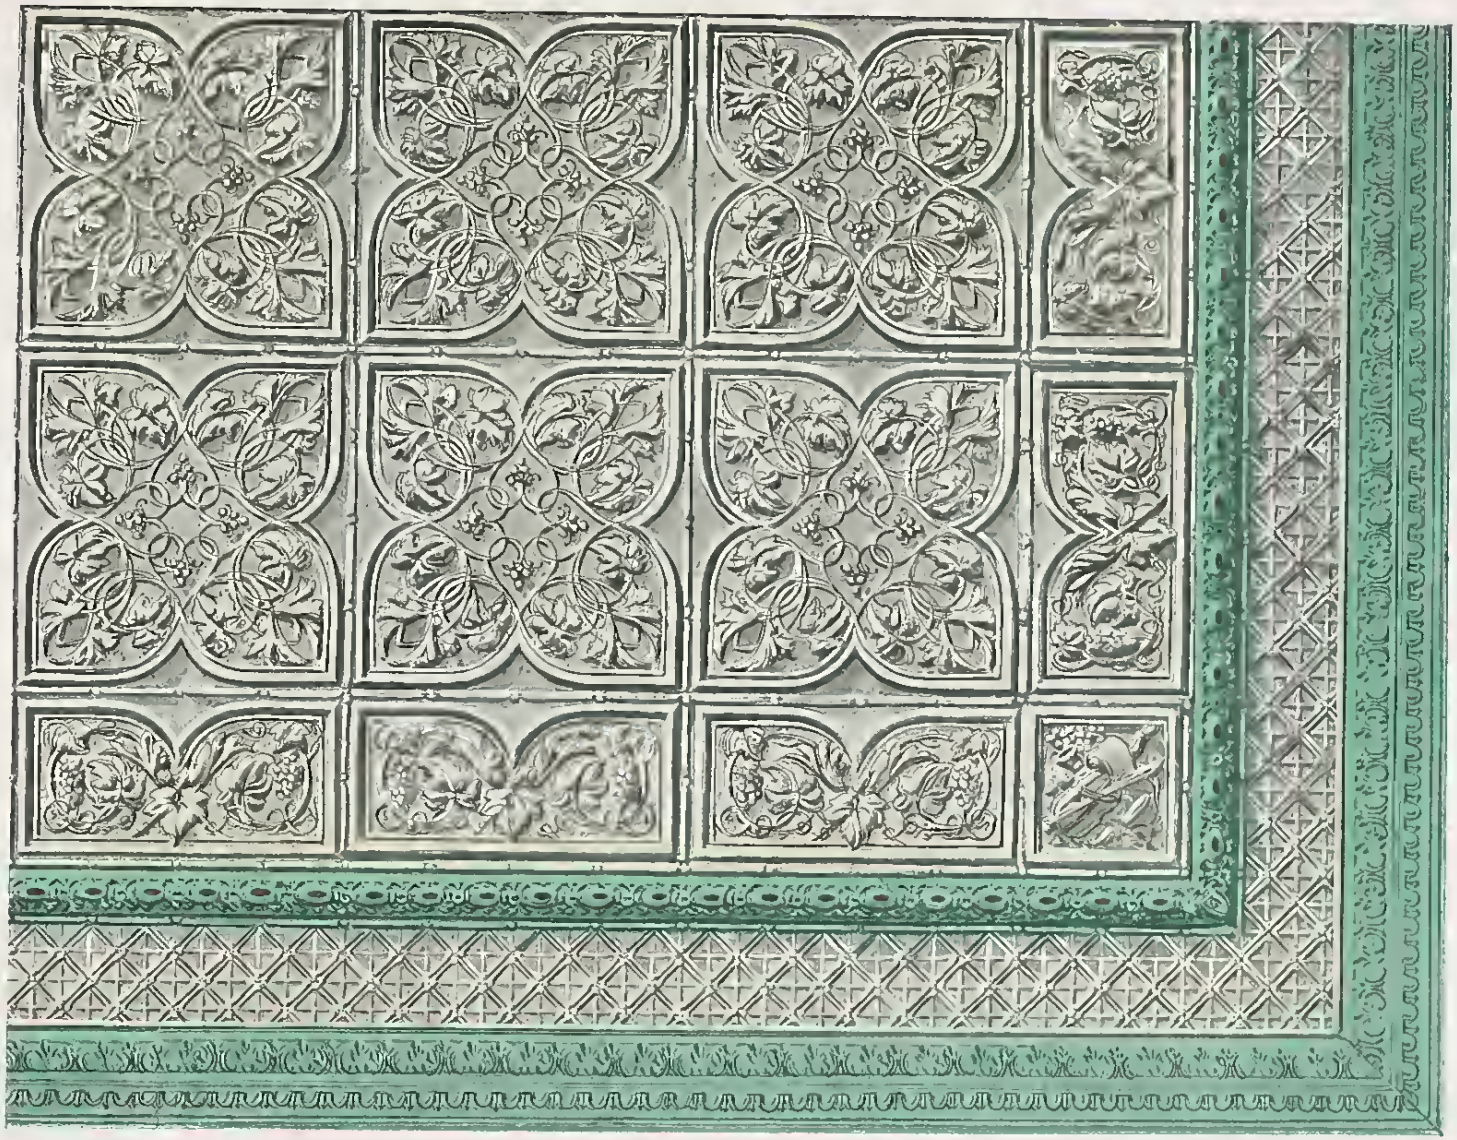
When stamped comice miters are used they should be fitted into the comers of the room before applying the cornice.

Close or "swedge" with a small dull tool any joints which may not have lapped tightly owing to the lapping beads having been bent or flattened in applying.

The list prices shown are for the plates, molding, etc., given one coat of white paint before shipping, and include regular brackets and nails for applying.

FURRING STRIPS ARE EXTRA AND WILL NOT BE SHIPPED UNLESS ORDERED.

Encaustic Metal Ceilings



Design No. 5952

Enameled in plain colors	$ 9.35 per square	Enameled in plain white	$10.10 per square
" " colors, with gold decorations	10.60 "	" " white, with gold decorations	11.35 "

ENCAUSTIC METAL CEILINGS

BEAUTY, DURABILITY, LESS TIME AND TROUBLE TO INSTALL, NO EXPENSE FOR REDECORATING

E have succeeded in producing an enameled metal ceiling with the combined qualities of a hard, porcelain-like surface with sufficient elasticity to stand transportation, handling and erecting without damage.

As both sides of the sheet are enameled, Encaustic Metal Ceilings are practically indestructible. They are not affected by leaking or broken water pipes. The colors cannot fade nor the gold decoration tarnish, as they are burned on and are covered with a transparent enamel, which is also burned on and protects them from the action of the atmosphere.

Encaustic Metal Ceilings are complete when placed in position, and your room will not be torn up and full of scaffolding for days while the ceiling is being decorated. When the erectors are through the ceiling is finished. No waiting for painters. No paint spots on floor and walls.

When the ceiling becomes soiled or smoked it is only necessary to use good soap, warm water and a sponge to restore the original beauty. They can be washed as often as may be necessary without losing their fresh appearance.

Encaustic Metal Ceilings are as easily erected as painted ones, and can be erected by any one familiar with the erection of metal ceilings.

If furnished with diagrams and dimensions, we are pleased to prepare drawings, showing suitable designs, and will furnish estimates without charge.

As both sides of the sheet are enameled, Encaustic Metal Ceilings are practically indestructible. They are not affected by leaking or broken water pipes. The colors cannot fade nor the gold decoration tarnish, as they are burned on and are covered with a transparent enamel, which is also burned on and protects them from the action of the atmosphere.

Encaustic Metal Ceilings are complete when placed in position, and your room will not be torn up and full of scaffolding for days while the ceiling is being decorated. When the erectors are through the ceiling is finished. No waiting for painters. No paint spots on floor and walls.

When the ceiling becomes soiled or smoked it is only necessary to use good soap, warm water and a sponge to restore the original beauty. They can be washed as often as may be necessary without losing their fresh appearance.

Encaustic Metal Ceilings are as easily erected as painted ones, and can be erected by any one familiar with the erection of metal ceilings.

If furnished with diagrams and dimensions, we are pleased to prepare drawings, showing suitable designs, and will furnish estimates without charge.

ENCAUSTIC METAL CEILINGS

BEAUTY, DURABILITY, LESS TIME AND TROUBLE TO INSTALL, NO EXPENSE FOR REDECORATING

WE have succeeded in producing an enameled metal ceiling with the combined qualities of a hard, porcelain-like surface with sufficient elasticity to stand transportation, handling and erecting without damage.

As both sides of the sheet are enameled, Encaustic Metal Ceilings are practically indestructible. They are not affected by leaking or broken water pipes. The colors cannot fade nor the gold decoration tarnish, as they are burned on and are covered with a transparent enamel, which is also burned on and protects them from the action of the atmosphere.

Encaustic Metal Ceilings are complete when placed in position, and your room will not be torn up and full of scaffolding for days while the ceiling is being decorated. When the erectors are through the ceiling is finished. No waiting for painters. No paint spots on floor and walls.

When the ceiling becomes soiled or smoked it is only necessary to use good soap, warm water and a sponge to restore the original beauty. They can be washed as often as may be necessary without losing their fresh appearance.

Encaustic Metal Ceilings are as easily erected as painted ones, and can be erected by any one familiar with the erection of metal ceilings.

If furnished with diagrams and dimensions, we are pleased to prepare drawings, showing suitable designs, and will furnish estimates without charge.

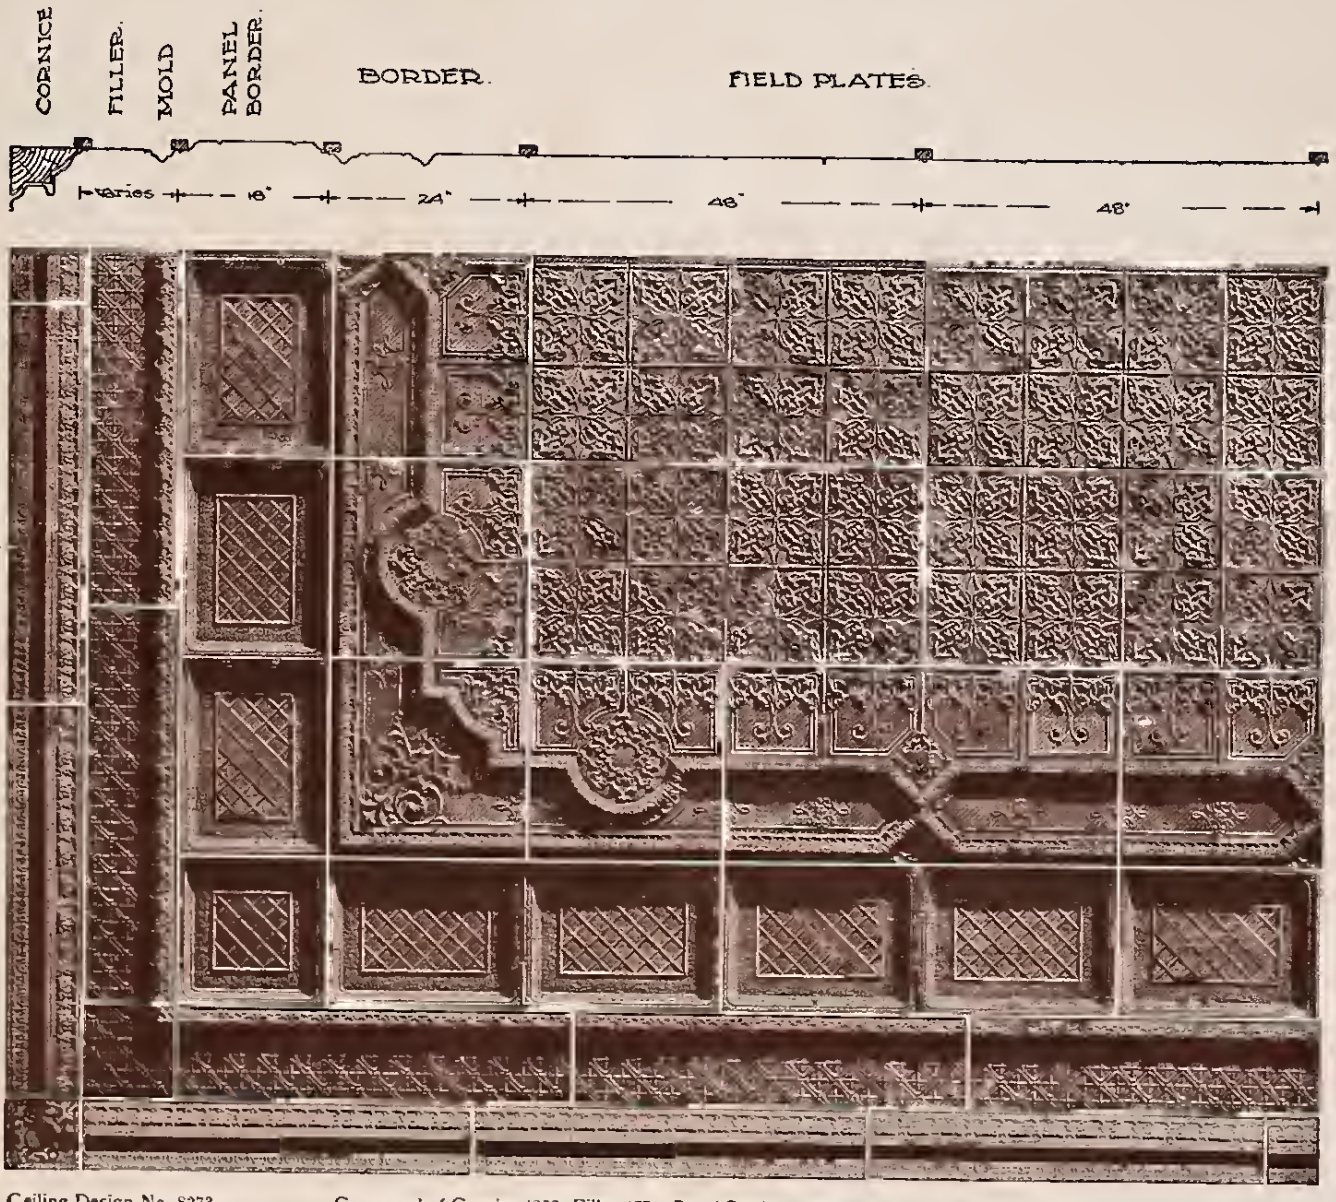
Wheeling Ceiling Analyzed to Show Simplicity of Erection.



Ceiling Design No. 8273.

Composed of Cornice 4292, Filler 4574, Panel Border 4431, Border 4343, 4347, Field 4342.
Average price $9.10 per square, not including furring strips.
Note—Price varies with size and shape of room.

Lines have been drawn on this design to indicate every joint, showing how easily the design is analyzed so as to make plain the individual parts of the Ceiling and the simple method of erecting same.

With each Ceiling ordered we send an accurate working plan showing every part of the design and the place in which it belongs when erected.

In designing the joints—both Dot and Dash Beads and the Inter-Locking—we have had in mind the appearance in connection with the design with which they are used.

Wheeling Metal Ceilings have perfect fitting joints and are therefore easiest erected, saving time and money in cost of installation.

Directions for Ordering on Back of this Sheet.

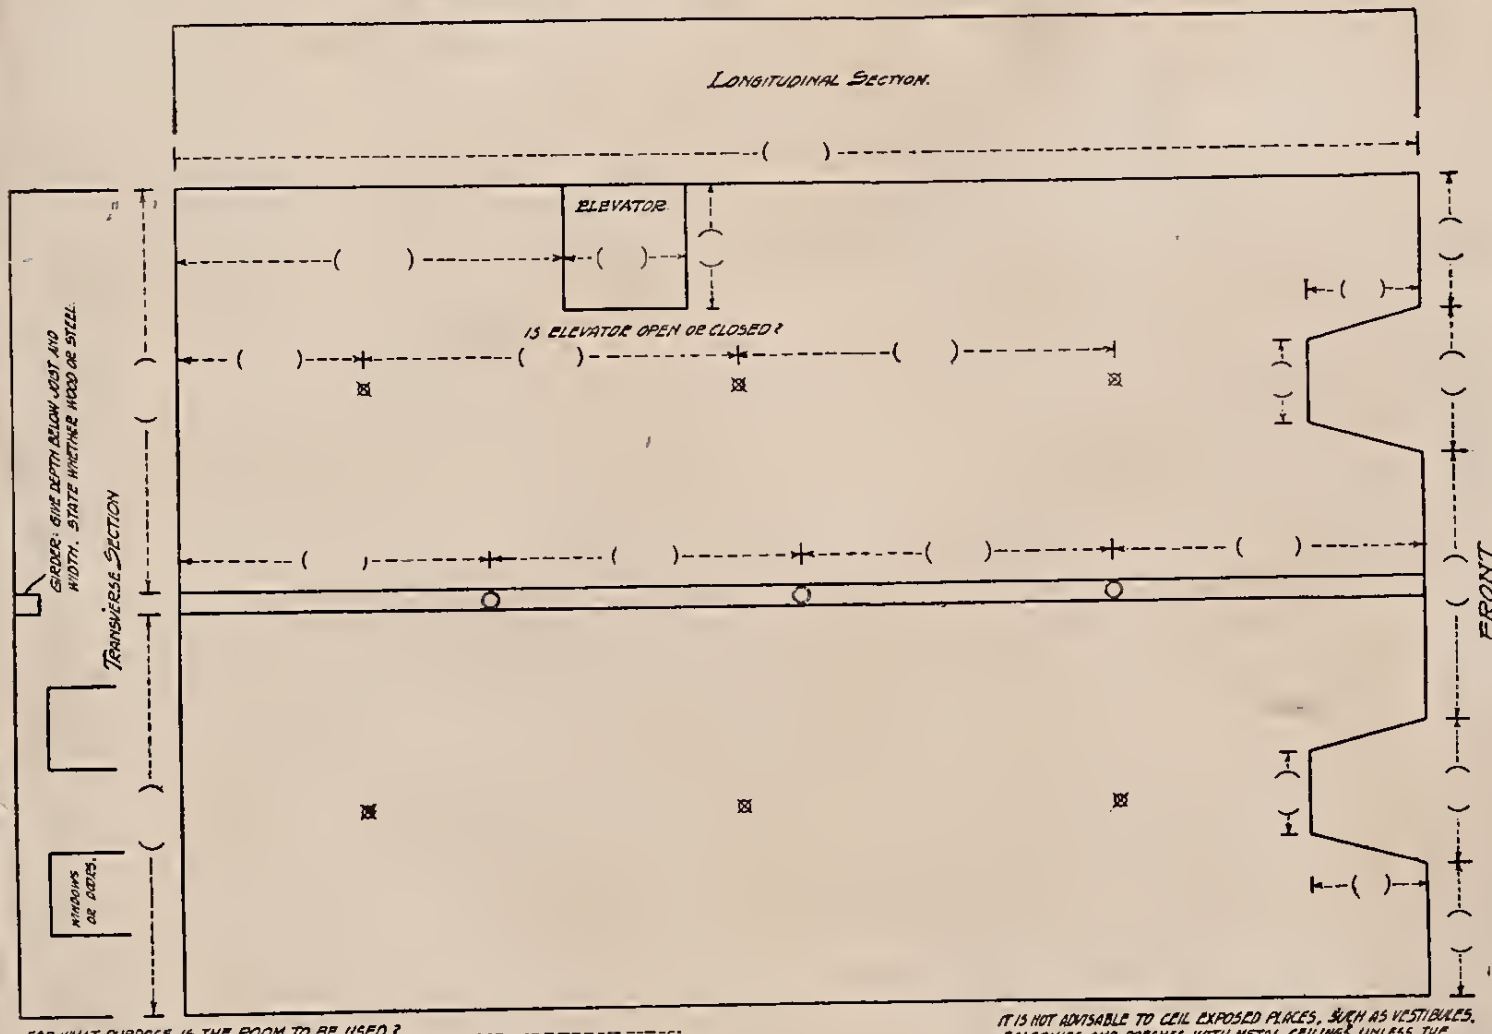
FOLD UP OR TEAR OFF ALONG THE PERFORATED LINE.

Ordering Wheeling Metal Ceilings or Side Walls is a simple and easy matter. Make a pencil sketch of each room to be ceiled, giving accurate measurements of length and width, showing all offsets and irregularities with their sizes and locations; give the height of your ceiling and show how near the door and window casings come to the ceiling; show position of your light fixtures.

For Side Wall make your sketch showing all Door and Window openings, all Offsets, Stairways, etc., with their sizes and locations; show the height of the Base Board and the depth of Cornice you expect to use.

Below is a diagram of a regular rectangular room; it may do for your measurements.

WHEELING METAL CEILINGS---Measurement Diagram



FOR WHAT PURPOSE IS THE ROOM TO BE USED?
IS IT NEW, OLD OR REMODELED BUILDING?
ARE THE CEILINGS AND WALLS PLASTERED?
WHAT DEPTH OF CORNICE OR WALL FINISH MAY BE USED?
WHAT IS HEIGHT OF STORY FROM CEILING TO FLOOR?
IF CENTERS ARE DESIRED, GIVE NUMBER AND LOCATION.
GIVE SELECTION OR PREFERENCE OF DESIGN WANTED.
MAKE DIAGRAM AND GIVE MEASUREMENTS AS INDICATED ON THIS ONE.

IT IS NOT ADVISABLE TO CEIL EXPOSED PLACES, SUCH AS VESTIBULES, BALCONIES AND PORCHES, WITH METAL CEILINGS, UNLESS THE SPACES ARE FIRST SHEATHED SOLID WITH BOARDS AND COVERED WITH BUILDING PAPER, TO PREVENT THE METAL FROM SWEATING.—THIS IS CAUSED BY THE UNEQUAL TEMPERATURE OF THE ENCLOSED AIR ABOVE CEILING AND THE OUT SIDE AIR.

IF THERE ARE ANY CORNERS IN THE ROOM THAT ARE NOT SQUARE, THE ANGLE MAY BE CORRECTLY INDICATED BY THE SIMPLE METHOD SHOWN IN FIGURE 2. MEASURE AN EQUAL DISTANCE ALONG EACH WALL - 10, 12 OR ANY NUMBER OF FEET (THE GREATER THE DISTANCE THE BETTER) AND THEN GIVE THE LENGTH OF A STRAIGHT LINE CONNECTING THESE POINTS, TO THE FRACTION OF AN INCH.
